

About us

We're Reading Room, an award-winning digital consultancy. For over 20 years we've been helping businesses to solve problems and unlock value for their users.

One standout thread flows through all our work; we deliver bespoke digital solutions that focus on how people experience technology and bridge the gap between strategic, design, and technical thinking.

We're not afraid to challenge conventional thinking and we're well known for our candid, jargon-free approach to delivery.

Our culture is built on trust, collaboration, optimism, inclusivity, and diversity.

Our work adheres closely to the principles of user-centric design and delivers client work using agile processes, and in-depth discovery.

With a forward-thinking mindset, Reading Room has thrived amongst the chaos of an ever-shifting digital landscape — winning industry accolades and attracting ambitious clients to be part of our journey.

We're now fiercely proud to be part of the independently owned Fat Media Group.
